

LIGHTING & ANGLES

A close-up, top-down view of a person's hands holding a black smartphone over a wooden table. The phone's screen displays a photo of several small plates of food, including what looks like a burger, fried items, and a salad. The background is slightly blurred, showing more food on the table and a glass of dark liquid. The text 'LIGHTING & ANGLES' is overlaid in large, white, bold, sans-serif capital letters across the center of the image.

ANGLES

CAMERA ANGLES

Camera angle is the upward angle of the camera in relation to the subject, not the rotation of the camera itself!

CAMERA ANGLES

Camera Angles depend on the subject and the desired effect of the shot.

There is no set shot for every scene, but there are scenes that are enhanced by certain angles!

COMMON ANGLES

STRAIGHT ON SHOTS

**+ VERY ONE-ON-ONE
& PERSONAL**

**+ GREAT TO SHOW
EMOTION**

**+ SHOWS THE
SUBJECT FROM A
VERY NATURAL
PERSPECTIVE**

HIGH ANGLE SHOTS

**+ ADDS A SENSE OF
VULNERABILITY
AND SMALLNESS**

**+ GREAT FOR
CHILDREN OR PETS**

**+ SLIGHT HIGH
ANGLES MAKE YOUR
FACE NARROWER**

BIRDS EYE VIEW

**+ GREAT FOR FOOD
PHOTOGRAPHY**

**+ WORKS WELL TO
EMPHASIZE SCALE**

**+ GOOD FOR
CITYSCAPES AND
LANDSCAPES**

LOW ANGLE SHOTS

**+ ADDS A SENSE OF
DOMINANCE AND
SCALE**

**+ GREAT FOR LARGE
SUBJECTS**

**+ SLIGHT LOW
ANGLES MAKE YOUR
FACE FULLER**

WORMS EYE VIEW

**+ GREAT FOR
ARCHITECTURE**

**+ WORKS WELL TO
EMPHASIZE SCALE**

**+ GOOD FOR
LANDSCAPES AND
SMALLER SUBJECTS**

LIGHTING

3 POINT LIGHTING

3 Point lighting is a technique used to light a subject with 3 different light sources

1. KEY LIGHT

Main light source

2. RIM LIGHT

Creates highlights & contours

3. FILL LIGHT

Used to balance shadows and highlights

RIM LIGHT

KEY LIGHT

FILL LIGHT

KEY

KEY + RIM

KEY + RIM + FILL

Key

Fill

Rim

A close-up shot of Leonardo DiCaprio in a brown suit, white shirt, and patterned tie. He has a yellow bandage on his forehead and a serious expression. In the background, another man in a suit is visible but out of focus. The scene is lit with warm, dramatic lighting.

RIM

KEY

FILL

HARD & SOFT LIGHTS

This is used to refer to the intensity of the shadows and highlights

Hard Lighting creates strong shadows and defined features

Soft Lighting does the opposite and creates lighter shadows and softened contours

SOFTBOXES ARE USED TO MAKE SOFTLIGHTING

BROADSIDE LIGHTING

With the subject at an angle, it is the side closest to the camera.

The light would hit the subject at an angle on the nearside of the face.

SHORTSIDE LIGHTING

With the subject at an angle, it is the side away from the camera.

The light would hit the subject at an angle on the farside of the face.

BROADSIDE

SHORTSIDE

FRONT LIGHTING

With the subject facing the camera, light would hit the subject from the front

Very basic, not much visual interest

BACK LIGHTING

With the subject facing the camera, light would hit the subject from behind

This will create a halo effect, use this in combination to other lighting methods!

SPLIT LIGHTING

With the subject facing the camera, light would hit the subject at directly from one side. This will **SPLIT** the lighting into dark and light halves.

REMBRANDT LIGHTING

With the subject at an angle, the light would hit the subject from a side but slightly angled from above.

This will create a unique triangle shape patch on the face!

BUTTERFLY LIGHTING

With the subject facing the camera, light would hit the subject from the front but slightly angled from above.

This creates a “butterfly” shaped shadow under the nose and cheeks. Very dramatic effect!

CLAMSHELL LIGHTING

Same setup as butterfly lighting but with a reflector set directly below the subject.

Lights up the face a lot and eliminates most of the shadows

LOOP LIGHTING

With the subject at an angle, light would hit the subject at a 45 degree angle from just above eye level.

This is one of the most common form of lighting in studios!

REFLECTORS

Reflectors are used to reflect the main source of light back at the subject from a different angle.

This softens the shadows and lights up darker areas

They can also be used as a fill light or rim light!
